

(TMI Focus, Vol. XVIII, No. 2, Spring 1996)

## **RESEARCH UPDATE**

Monroe Institute and The Center for the Study of Complementary and Alternative Therapies, The University of Virginia, have agreed to collaborate in researching the Hemi-Sync process and the effectiveness of Hemi-Sync tapes across selected clinical and laboratory settings. Our cooperative efforts in this research should lead to publications in peer review journals. We look forward to working with CSCAT and keep you informed of our progress in future publications from the Institute.
